**We don't Just Design Pots,  
We Design Emotions.**

*Our design explores the relationship between Jungian Archetypes and life as performance. With influences as diverse as Dieter Rams and Buckminster Fuller, new combinations are generated from both traditional and modern meaning.*

*We have been fascinated by the essential unreality of the moment. What starts out as debased sense of concepts soon turns into carnival of power leaving only a sense of chaos and dawn of new synthesis.*

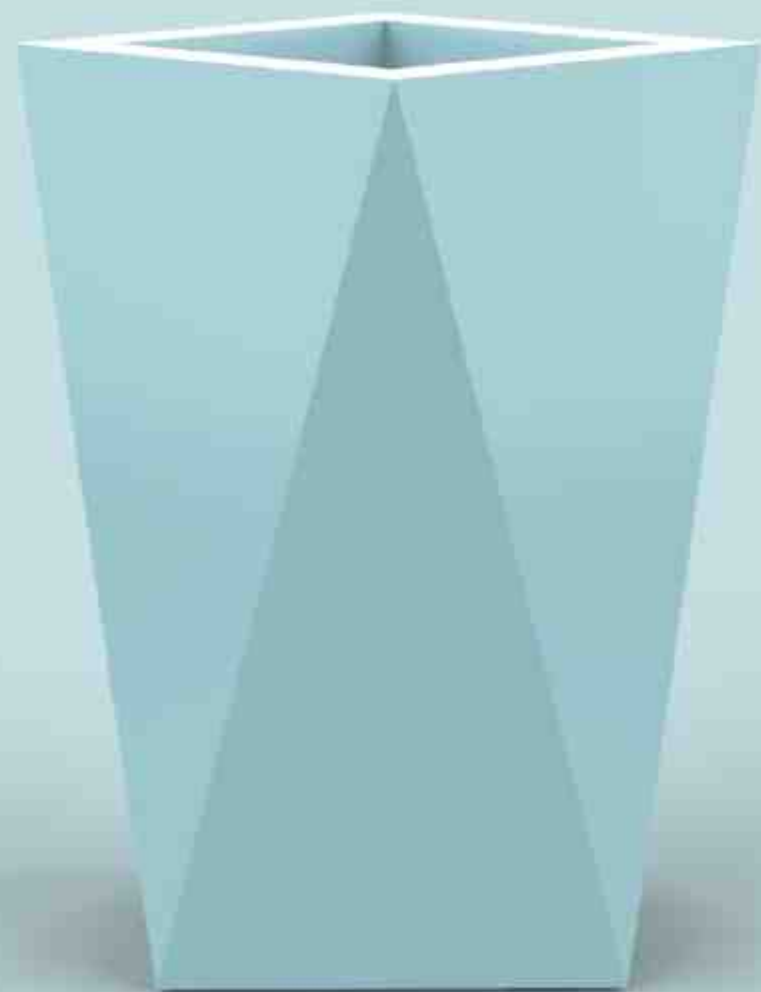

*As shimmering replicas become reconfigured through opening boundaries and personal practice, the viewer is left with a testament to the limits of our world.*
